TWITCH SOLVES ISL

Episode 65

Problem

Rectangles BCC_1B_2 , CAA_1C_2 , and ABB_1A_2 are erected outside an acute triangle ABC . Suppose that

$$\angle BC_1C + \angle CA_1A + \angle AB_1B = 180^\circ.$$

Prove that lines B_1C_2 , C_1A_2 , and A_1B_2 are concurrent.

Solution

The angle condition implies the circumcircles of the three rectangles concur at a single point P . Then $\angle CPB_2 = \angle CPA_1 = 90^\circ$, hence P lies on A_1B_2 etc., so we're done.

Remark. As one might guess from the two-sentence solution, the entire difficulty of the problem is getting the characterization of the concurrence point.
